

# Instructions

## How-To achieve results with ColorAnt

## How to Automatically Optimize Measurement Data

The steps below allow the user to duplicate the results of our case study with the demo measurement data provided. The instructions are intended to give the user an overview of the simple yet powerful features of ColorAnt.

### Step 1:

Launch ColorAnt and locate the sample measurement file located in the folder marked "CMYK uncorrected measurement data" and drag the file marked.

### Step 2:

Click on the "Automatic" Icon. In the pop-up dialog press "start" to process and optimize the measurement data.

### Step 3:

The history window indicates which corrections have been applied to the measurement data.
